said respective first and second orifices in the form of strands or as a spray onto the substrate, said discharged components remaining physically isolated from each other until at least one of said components contacts said substrate;

wherein the hardener comprises a volatile acid and is either free from filler or includes filler in an amount of less than 20% by weight.

REMARKS

Applicants wish to thank Examiners Fletcher and Bock for the courteous personal interview of September 17, 2002 at which the claims and the art of record were discussed.

New claim 39 has been added. This claim includes the recitation that the resin and hardener components are physically isolated from each other until at least one of the components contacts the substrate.

The Commissioner is hereby authorized to charge any required fees associated with this communication and during the pendency of the application under 37 CFR 1.16 and 37 CFR 1.17 or to credit any overpayment to Deposit Account No. 501348.
